

## JoeTap Quad System

The JoeTap Quad Beverage Nitrogenation System offers a compact countertop solution accommodating up to four products on tap such as coffees, teas, and lemonades served either still or nitrogenated with the push of a button. The illuminated button indicates nitro dispense. Each product benefits from a precise nitro infusion control, ensuring consistent pours every time. An onboard sediment filter maintains a clean beverage flow for your customers.

Note: Nitrogen Generator shown in image is not included or provided by Wunder-Bar.

### Additional Key Features

- ❖ Flexible Equipment Configuration for left or right tower placement with field reversible door swing
- ❖ 4 products on tap + 2 dispense formats (still & nitro) = 8 beverage offerings
- ❖ Separate and precise nitro infusion control for each product tap
- ❖ 304 grade stainless steel refrigerated cabinet holds up to 4 stainless steel 2.5gal beverage tanks
